

Beyond Gratitude

Nurse managers take on many complex responsibilities. They embody both nursing and executive roles.

Create healthy and compassionate workplaces where nurses can thrive.

Drive team development, resiliency and competency.

Ensure the safety and standards of quality patient care are maintained.

Manage human and financial resources across staffing, supplies and more.

Ensure nurses have access to proper technology and information.

Align patient care with the organization's strategic goals.

Visit [NurseManager.org](https://www.nursemanager.org) for more on our commitment to display meaningful gratitude to nurse managers and encourage people everywhere to do the same.
